

DDoS Protection

Help protect your network from costly volumetric and app-based attacks with DDoS Protection powered by Radware®.

Distributed denial of service (DDoS) attacks are designed to flood connectivity to a network so that the intended users cannot access their resources. They are initiated with the goal of halting network operations, potentially disrupting the flow of business. DDoS Protection is a subscription-based service designed to detect and mitigate these types of network attacks and help keep your network up and running.

Powered by Radware, DDoS Protection applies cloud-based intelligence to quickly evaluate your network activity and identify threats attacking your Dedicated Fiber Internet, Secure Dedicated Fiber Internet, Enterprise Internet or third-party service. Attack mitigation begins automatically to help keep your resources available.

Product highlights

- **Fast resolution:** Quickly and automatically identify and remediate malicious traffic, helping to minimize the impact of attacks.
- **Adaptive evaluation:** Comprehensive traffic evaluation that uses advanced analytics to identify anomalies indicating an attack, specific to traffic flow at each customer location.
- **Scalable solution:** Easily and seamlessly expand as your needs grow.
- **Continuous support:** Always-available, single point of contact connects customers directly to our network and security experts for swift issue resolution.

Key features

- In-depth reports that offer traffic visibility, insights and analytics into attacks and network performance.
- Automatic threat detection and proactive mitigation of volumetric attacks across your internet connections.
- Precise, client-specific traffic evaluation and targeted IP-address cleansing using machine learning and AI.
- Targeted scrubbing decreases the performance impact on non-affected traffic.
- Supported by dedicated local account teams and 100% U.S.-based support, available 24/7.

Detect and Mitigate DDoS Protection

Always-on DDoS Protection

Available plans

	Detect and Mitigate for Enterprise Internet	Detect and Mitigate	Always-On
Best for	Small business	Mid-market business, enterprise business	Enterprise business
Plan summary	Detect and Mitigate protection for Enterprise Internet, mitigation and post-event reporting	Detect and Mitigate protection, mitigation and portal visibility	Continuous, proactive protection for multiple circuits and portal visibility
Response time	From detection to auto-mitigations in 2 mins or less	From detection to auto-mitigations in 2 mins or less	Real-time review and mitigation of inbound traffic with no detection lag
Detection	Volumetric	Volumetric	Volumetric and app-based
Mitigation	Scrubs volumetric and app-based threats until the attack is fully mitigated.		
Portal access	No	Yes	Yes
